Peter F. Pierangeli
1925-2015

This catalog is dedicated to the memory of Peter F. Pierangeli, Sr., President of PPP Mfg. Company, and former founder of the Pier-Angeli Company.

Peter's life is a true American story. When Pete and his wife, Irene, opened his business, he operated it from their home basement. After many years of hard work and growing pains, he grew his company and employed over hundreds of people across the U.S., while simultaneously developing other companies to serve the needs of customers in several different industries. He was extremely well-respected and treated all employees like they were part of his own.

As a devoted family man, visionary and entrepreneur, he inspired everyone who knew him to be a better person. Peter was a selfless, easy-going and extremely generous man who lived a life filled with joy and love. Peter's extraordinary impact will resonate for generations to come as we carry his memory in our hearts forever.

Better Alternative

Current plumbers use a wet, and often inevitably dirty rag which they carry from job to job, and put it in one's bathtub in order to block the overflow face plate and focus the pressure to allow clearing of the drain.

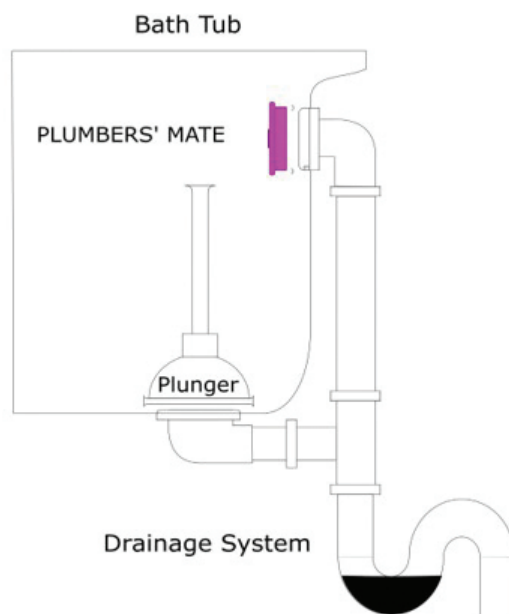

This new overflow cover will allow anyone to easily close and seal the overflow face plate to create a sufficient vacuum for efficient plumbing without the need for a rag.

Sanitary

This will also eliminate the need for dirty tools or fume causing products being introduced into the bathtub, where occupants bathe themselves. No more germ-filled rags will enter the bathtub for plumbing purposes.

Self-Sealing

This cover will be self-sealing, freeing the user's hands to focus on the plunger. The user will no longer need to commit one hand to holding a rag against the overflow face plate. Further, it creates a perfect and 100% seal.
